

What We Do

[Ecamm Live](#) is an all-in-one live streaming production platform for Mac that allows anyone to create professional quality live video broadcasts, pre-record video content, or podcasts.

Powerful Features

Ecamm Live includes everything needed to create and stream live video across multiple platforms, including the ability to easily connect your DSLR or mirrorless camera via USB connection, iPhone and Mac screen sharing, and more. With a built in live camera switcher, users can direct their production in real time

The app also allows users to save scenes, insert pre-recorded video, and add graphics so users can prepare their shows in advance. The possibilities are endless

Seamless Integration

Ecamm Live easily connects into Facebook Live, Youtube Live, Periscope, Twitch, and LinkedIn Live, putting the power of live video at the consumer's fingertips seamlessly.

Once live, the host is able to see and display viewer comments and reactions, as well as share these with their guests using our interview feature.

Completely Customizable

Personalization

- Overlays – the ability to add text, logos, lower-thirds, PDFs, camera sources, widgets, animated GIFs, and more allow Ecamm's customers to create personalized one-of-a-kind videos and live broadcasts.
- Comments – users can promote viewer comments to on screen overlays with just one click, adding to the over all experience of the stream.
- Camera Effects – Utilizing Ecamm's built-in studio-quality camera effects, users can utilize their green screen or blue screen to change their background (selecting their own photo or video background), adjust their picture settings, and apply a LUT to custom fit their needs.

Completely Customizable

Pre-recorded Video

Users can easily integrate pre-recorded video into their streams with a simple drag into the app to create more comprehensive and dynamic video segments. Or use Ecamm Live's record-only feature to record videos to use later. A live picture-in-picture function is also available to use alongside pre-recorded video integration.

Multi-Streaming

Ecamm Live's integration with [Restream.io](#) and [Switchboard Live](#) allows live streaming to multiple platforms simultaneously with one click. Additionally, Ecamm's built-in support for Restream's chat aggregation, allows for chat comments to be displayed from over 20 platforms – all in one place

Preview

Ecamm Live's Preview window allows users to quickly make adjustments to their broadcast while they are live, and publish these changes professionally. No need for your audience to witness your live changes.

Interview

Ecamm Live's Interview feature allows users to invite guests from anywhere. Simply send your guest the randomly generated interview link, and they can join from their browser. With features like Ecamm's live comment and reaction integration appearing in the browser, guests can relax and comfortably become part of the live video production.

Isolated Audio Tracks

With Ecamm Live's isolated audio feature, users can comfortably record their podcast and live stream at the same time knowing every guest, sound effect, and microphone will be saved on separate tracks of audio. Post production has never been easier.

Our Founders

Twin brothers Ken and Glen Aspeslagh founded Ecamm Network while in college in the 90s with the simple goal of building apps to help solve problems.

Cost

Ecamm Live offers two different package options: Standard (\$20/mo) and Pro (\$40/mo), each package offering varying functions and support. More info on pricing [here](#).
